We would like to have Cadmus review this revision to make sure what we commented on as far as the first version has been incorporated. And then, additionally, they have compiled new information in response to public comments on the draft version of the package that went out for public comment, and we need this new information reviewed. I am not clear on the deliverable for this review however, and where it fits in the OSW. We need to think this through and see if Cadmus has any ideas on how to best provide a review of this updated package. Thoughts?
